

You select the height... You select the side...
 You select the comfort level.
 It's YOUR choice.

Complete SLEEPrrr™ ADJUSTABLE

THERAPEUTICALLY DESIGNED

Two removable inserts allow you to change the shape and height to suit your comfort and postural needs.

Takes the risk out of your pillow being too high, too low, too hard or too soft. It's all so simple. One size suits all!

AVAILABLE IN TWO VERSIONS:

Deluxe foam version

Carved from premium-grade traditional foam and valued for its superb comfort and support qualities for people of all physiques. Using open-cellular technology, it is widely known for its longevity and economical price. Regarded by many health professionals world wide as the benchmark for achieving the ideal 'marriage' between comfort and good posture.

Memory™ Foam version – Now in two densities

Luxurious pillow in NASA inspired viscous foam (developed to help astronauts absorb gravity forces), Memory Foam literally moulds and conforms to the head and neck for even support, encouraging the natural curvature of the spine. Now in two densities: **Memory Original** – super-soft, first version launched, for those requiring a lower pillow; and **Memory Plus** – heavier density for broader physiques and for those who like more 'body' in their pillow.

"Feeling is believing"

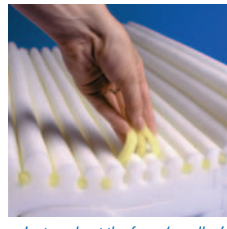

Please Note: A second set of firmer inserts is available for both Memory and Deluxe versions for those who may want an even fuller-body pillow. These firmer inserts are available at nominal cost.

Other main features...

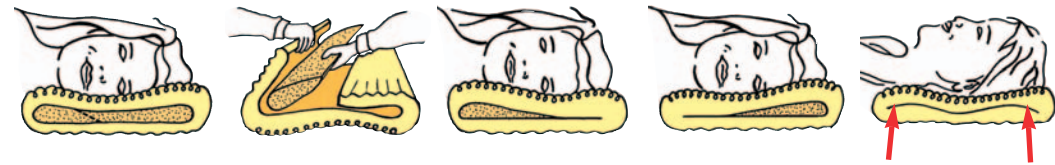

- Channels in the soft, textured surface, combined with the open-weave inner cover, allow air to circulate, thus dispersing so called 'warm spots'. IT BREATHES – NO SWEAT!
- Designed to encourage side sleeping. Helps breathing. HELPS MINIMISE 'SIMPLE' SNORING.
- Superb quality full-density foams selected for their pressure-diffusing and longevity properties.

...And you select the softness

You can also change the surface density of CompleteSleeprrr™ to suit your own comfort needs by simply taking out the one centimetre thick foam 'noodles' that are positioned within the channels in the pillow's surface... or leave in for a firmer feel.

Just peel out the foam 'noodles' if you desire softer support. It's your choice!

CompleteSleeprrr™ with both inserts intact, designed for average and above-average frame persons and ideal for side-sleepers. Pillow features a high and low side, so use which suits you best.

Correct alignment for side sleepers.

Encourages the natural curvature of the spine.

To delete insert (or sections of it) simply peel back underside and close flap again. Store inserts for possible later re-insertion if you want to re-adjust or re-plump the pillow.

For those with longer necks, simply leave in one insert under the neck on the high side and remove the other or turn the pillow around and try the same procedure with insert under the low side.

For those of smaller physiques, a popular alternative is to use high or low sides without an insert under the neck. It is easy to arrive at the comfort and support mix that is right for you.

With both inserts out, CompleteSleeprrr™ is now ideal for back sleepers, smaller-framed adults and children from 7 years and upwards.
